

# Microsoft Power Platform - App in a Day Workshop

A one-day workshop engagement that aims to provide a hands on, immersive experience empowering organisations of all types and sizes to explore how “low code/no code” Microsoft Power Platform and Power Apps provide incredible flexibility to create seamless, enterprise-grade workflows that streamline new or existing ERP systems cost-effectively. *This workshop will be hosted by QUANTIQ.*

## Workshop includes

- ✓ Learn how to quickly create custom business applications and automated connected workflows without writing code, leveraging the Microsoft Power Platform technologies: Power Apps and Power Automate
- ✓ Explore How Microsoft Power Apps could be deployed within your organisation to solve existing pain points, modernise highly customised workflows and connect silos.
- ✓ Understand how Common Data Service technology from Microsoft can help you easily connect legacy and third party data repositories of structured and unstructured data, in order to feed your new agile Power Apps solutions and quickly resolve enterprise workflow and reporting challenges.

Cost: £2,000\*

\*Workshop funding is subject to eligibility
