

# Microsoft Power Platform – Dashboard in a Day Workshop

A one-day Dashboard in a Day workshop engagement designed to drive usable, consumable intelligence across the organisation is on your to-do list. You'll learn how to get started straight out-of-the-box with Power BI for Dynamics 365, and how to create intelligent dynamic dashboards that empower your team. *This workshop will be hosted by Quantiq.*

## Workshop includes

- ✓ Discover how Power BI is different from other reporting tools, and how to create great Power BI Dashboards that drive intelligent agile decision making
- ✓ Acquire and develop the skills you need to utilise the Power BI ecosystem in order to accelerate your workflows
- ✓ Design patterns for dashboards and reports. Establish best practices for creating rich data visualisations in dynamic dashboards that meet your teams' needs
- ✓ Leave with an overview of the art and science behind visualisations, the implications behind choosing the right charts, the impact of colour, shape and size, and the use of Power BI custom visuals
- ✓ Review the Power BI data modelling and calculation capabilities and principles behind creating a comprehensive data model that meets your business requirements

Cost: £1,500\*

\*Workshop funding is subject to eligibility
